

Appendix Three: Additional topics suggested by respondents that relate to existing focus areas

The table below lists all the additional topics suggested by respondents that could be linked to an existing proposed focus area. In some cases the existing focus area is already intended to include these topics, while in other cases the existing focus area could be expanded to include these topics, with a new name for clarity.

Topic suggested as “missed”	Existing focus area that is already intended to include this topic	Existing focus area that could be expanded to include this topic	New name for focus area
Regional public transport		implications of State Highway 1	integrated transport
General transport including relationship to land use		implications of State Highway 1, and parking	integrated transport
Road safety		implications of State Highway 1	integrated transport
CWB and connected communities		implications of State Highway 1	integrated transport
Impact of commuter trains coming through Paraparaumu to Waikanae		implications of State Highway 1	integrated transport
Health impacts of planning	Subdivision and Development Principles and Requirements, Urban Design, expanded focus area of Integrated Transport		
Social infrastructure (including schools and health services)	residential amenity / character		
‘Dark sky’ policies to prevent overlighting	residential amenity / character		
Signs	landscape and residential amenity / character		

Topic suggested as “missed”	Existing focus area that is already intended to include this topic	Existing focus area that could be expanded to include this topic	New name for focus area
Boundary trees	residential amenity / character plus native tree protection		
Biodiversity		native tree protection and ecological sites	Biodiversity
Blue / green corridors, stream health, stormwater quality, and streamside vegetation		native tree protection and ecological sites	Biodiversity
Green space around rivers etc		reserves contributions	Open Space
Land for natural burials		reserves contributions	Open Space
Land for community gardens		reserves contributions	Open Space
Reserves management plans		reserves contributions	Open Space
River landscape	landscape		
Sand hills	landscape		
Natural character of coastal environment	landscape and native tree protection / ecological sites (expanded to Biodiversity)		
Natural character / environment	many of the proposed focus areas (e.g. landscape and native tree protection / ecological sites)		
Dune stabilisation	coastal hazards		
Sustainable buildings	renewable energy		

Topic suggested as “missed”	Existing focus area that is already intended to include this topic	Existing focus area that could be expanded to include this topic	New name for focus area
Peak oil	renewable energy		
Shelter belts	rural land use and productivity		
Commercial activities in rural zone	rural land use and productivity		
Civil defence / disaster preparedness / natural hazards	Flooding Coastal Hazards		
Broadband	Subdivision and Development Principles and Requirements		
Economic health and vitality		industrial and commercial employment land	Economic health and vitality
Airport zone	industrial and commercial employment land		
Radio frequency emissions		control over cell phone towers	Cell phone towers and other radio frequency emissions
Site-specific rezoning requests	rural land use and productivity, implications of State Highway 1 decisions, possible new focus area on growth management		

Topic suggested as “missed”	Existing focus area that is already intended to include this topic	Existing focus area that could be expanded to include this topic	New name for focus area
Regional consistency for provisions	will be considered throughout all focus areas, in part through Wellington Regional Strategy		
Evidence-based and effects-based approach	throughout all focus areas		
Correcting inaccurately mapped features	native tree protection and ecological sites, landscape, and throughout entire Review
