# **GRUZ** — Rural Zones

### The Rural Environment

The Rural *Zones* of the Kāpiti Coast encompass a wide range of landform types, landscapes, land uses and activities. These range from horticulture on the plains in and around Ōtaki, to pastoral *farming* on the dune country and foothills of the Tararua Ranges. The Rural *Zones* are of considerable value to the residents of the District. The farmers, horticulturists, rural service industries, and businesses and future generations of people who seek employment in rural industries depend on the sustainable management of the resources found in these *zones*. The landscape character and amenity of the Rural *Zones* are major determinants of the overall visual character of the District.

### **Zone Descriptions**

The rural Kāpiti area comprises six distinct areas which are based upon their individual characteristics and anticipated uses. This chapter manages two of these areas; the Rural Dunes and Rural Eco-Hamlet Precincts of the General Rural Zone. The general character of all Rural Zones is defined by an overall openness and a relatively low presence of *buildings* and *structures* compared to the more urbanised areas of the District, as well as extensive areas of crops, pasture and trees.

#### **Rural Dunes Precinct of the General Rural Zone**

The Rural Dunes Precinct comprises the sand country, including consolidated sand dunes, interdune sandplains and *wetlands*. It is characterised by undulating topography with slopes of up to 25 degrees and is exposed to salt laden winds. The dune area is generally unsuitable for horticulture and intensive agriculture. Land use and *development* in the Rural Dunes Precinct are anticipated to be carried out in a manner that retains the sensitive landscape and ecological character of the area, including *wetlands*.

The *natural character* of the *zone* can be adversely affected by the presence of highly visible *development* and changes to dune landforms which cause disturbance to the natural contours and any significant cultural and ecological features of the area. The overall density of *development* should be very low so as to retain the area's sense of openness. However, where multiple *buildings* are proposed for a given location within the *zone*, *clustering* may be an appropriate response to mitigate the built impact.

### Rural Eco-Hamlet Precinct of the General Rural Zone

The Rural Eco-Hamlet *Zone* comprises the land adjacent to identified urban growth areas at Waikanae North and Ōtaki (which include consolidated sand dunes, interdune sandplains and wetlands) and shares similar physical characteristics with the Rural Dunes Precinct. Land use and *development* in the Rural Eco-Hamlet Precinct are anticipated to be carried out in a manner that enhances the carrying capacity of the area in terms of *primary production* activities or ecological restoration, and recognises the sensitive landscape and ecological character of the area. The sandy soils of the dunes filter *stormwater* and effluent easily, making these areas more suitable to accommodate denser *clustered development* in some areas with the interdune hollows and peaty soils retained as open balance *allotments*. The intention is to provide a buffer or transition between the proposed urban area and the Rural *Zones*.

Development should entail minimal disturbance to the natural contours and any significant cultural and ecological features of the area. While some *development* is anticipated to be *clustered*, the overall density of *development* should be relatively low so as to retain the area's sense of openness.

### **Focus on Production**

Collectively, the District's broad range of rural areas has significant potential for various *primary production* activities. This includes the production of food, fibre, fuel and building materials for local

Page 1 of 22 Print Date: 08/04/2025

consumption, and for regional, national and global distribution. The continued use of the Rural *Zones* for these activities is important for the on-going resilience, health, and social and economic well-being of the District's communities.

The Plan provisions for all Rural Zones reflect the predominance of *primary production* activities. However, the provisions also recognise that these activities must be carried out in a manner that maintains the character and amenity of the rural area and adjoining non-rural *zones*. The Rural *Zone* provisions work in tandem with provisions in other parts of the Plan — for example the Natural Environment Values, Coastal Environment, Hazards and Risks, and Historical and Cultural Values Chapters — to ensure that new rural *subdivision*, *land* use and *development* proceeds in accordance with all relevant Plan Objectives.

The Plan also recognises the unique operational characteristics of some *primary production* activities, such as the harvesting of *plantation forestry* and *extractive industries*, and the need to provide for their efficient and on-going operation, whilst avoiding, remedying or mitigating their environmental *effects*.

Provision is also made for new *buildings* on *subject sites* in the Rural *Zones*, including a *residential unit* and other potential *buildings* where they are *ancillary activities* to either the *residential* or *primary production* activities on the *subject site*. However, the scale and location of these *buildings* and *structures* must be managed to ensure the *productive potential* of the land is not compromised.

### **Rural Character and Amenity**

The amenity and character of the Rural *Zones* has value for the whole District. The Rural *Zones* provide a visual space between urban settlements and supports the part of the District's identity related to the separation of distinct settlements by a more open landscape. The general openness of rural land and the presence of various types of *primary production* activities form part of the valued rural character.

Travel on rural *roads* is an important part of the rural experience for residents and visitors, for all travel modes including walking, cycling and horse riding. Existing patterns of vegetation (such as *shelter belts*) and areas of *indigenous vegetation* in particular areas are also important for visual integration and coherence in the rural area.

There is a range of features associated with activities in the Rural *Zones* that contributes to the rural character and which can vary across the District.

These features include, but are not limited to:

- significant areas of land in pasture, crops, forestry and/or indigenous vegetation;
- the general absence of structures other than those related to primary production activities and network utilities;
- a high ratio of open space relative to the built environment;
- noises, smells, dust and effects associated with the use of rural land for a wide range of agricultural, horticultural, forestry and extractive industries;
- low population densities relative to urban areas; and
- houses and buildings of a variety of scales, forms and building

## **Reverse Sensitivity**

The Rural *Zones* are a productive *environment* and therefore many *farming* and *primary production* activities which are anticipated in the Rural *Zones* are noisy, smelly or dusty at times. The time of day and year that *primary production* activities and *farming* activities occur can conflict with the expectations of rural residents to enjoy 'peace and quiet'. When planning new *development* the amenity of both existing residents and requirements of *primary production* activities must be considered. Privacy, shelter, access to *open space*, rural amenity and security need to be thought about to ensure the quality of lifestyle consistent with a working rural *environment* is sustained for existing residents.

Reverse sensitivity is recognised as an issue under the effects-based planning regime of the RMA and needs to be considered. The rural area is particularly prone to reverse sensitivity effects. Many primary production activities such as quarrying activities, horticultural activities (e.g. spraying and

Page 2 of 22

bird scaring devices), *state highways* and other lawfully established activities are located in rural areas. Future residents of the rural area who will fill the vacant sections have the potential to create an increased risk of *reverse sensitivity* problems. *Reverse sensitivity* has the potential to compromise productive land uses, such as *farming* and *quarrying activities* that legitimately exist in the Rural *Zones*.

The District Plan provides policies and rules to address *reverse sensitivity* issues for future *subdivision* and *development*, and zoning to direct residential areas, away from incompatible activities. The layout, design and density of *subdivision* is restricted to ensure that it is appropriate to the *zone* where it is located.

## **Strategic Context**

The Primary Objectives that this chapter implements are:

- DO-O1 Tangata Whenua;
- DO-O3 Development Management;
- DO-O4 Coastal Environment;
- DO-O6 Rural Productivity;
- DO-O8 Strong Communities;
- DO-O11 Character and Amenity Values;
- DO-O12 Housing Choice and Affordability;
- DO-O13 Infrastructure;
- DO-O14 Access and Transport;
- DO-O15 Economic Vitality; and
- DO-O17 Open Spaces / Active Communities.

## DO-O1 Tangata Whenua

To work in partnership with the *tangata whenua* of the District in order to maintain *kaitiakitanga* of the District's resources and ensure that decisions affecting the natural *environment* in the District are made in accordance with the principles of Te Tiriti o Waitangi (Treaty of Waitangi).

## DO-O3 Development Management

Amended 01 Sep 23 PC2

To maintain a consolidated urban form within existing urban areas and a limited number of identified growth areas, and to provide for the *development* of new urban areas where these can be efficiently serviced and integrated with existing townships, delivering:

- urban areas which maximise the efficient end use of energy and integration with infrastructure;
- a variety of living and working areas in a manner which reinforces the function and vitality of centres;
- 3. an urban environment that enables more people to live in, and more businesses and community services to be located in, parts of the urban environment:
  - a. that are in or near a *Centre Zone* or other area with many employment opportunities;
  - b. that are well serviced by existing or planned public or active transport; or
  - where there is high demand for housing or for business land relative to other areas within the urban environment;

while accommodating identified qualifying matters that constrain development;

- 4. resilient communities where development does not result in an increase in risk to life or severity of damage to property from natural hazard events;
- 5. higher residential densities in locations that are close to centres and public open spaces, with good access to public transport;
- 6. management of development in areas of special character or amenity in a manner that has regard to those special values;
- sustainable natural processes including freshwater systems, areas characterised by the productive potential of the land, ecological integrity, identified landscapes and features, and other places of significant natural amenity;

Page 3 of 22

8. an adequate supply of housing and areas for business/employment to meet the needs of the District's anticipated population which is provided at a rate and in a manner that can be sustained within the finite carrying capacity of the District;

- 9. management of the location and effects of potentially incompatible land uses including any interface between such uses; and
- 10. urban environments that support reductions in greenhouse gas emissions and are resilient to the current and future effects of climate change.

### DO-O4 Coastal Environment

To have a coastal environment where:

- 1. areas of outstanding natural character and high natural character, outstanding natural features and landscapes, areas of significant indigenous vegetation and significant habitats of indigenous fauna are identified and protected;
- areas of outstanding natural character and high natural character are restored where degraded;
- the effects of inappropriate subdivision, use and development are avoided, remedied, or mitigated;
- 4. public access to and along the coast to facilitate active and passive recreational use is maintained and enhanced while managing inappropriate vehicle access; and
- Inappropriate development does not result in further loss of coastal dunes in the area mapped as the coastal environment.

### **DO-O6** Rural Productivity

To sustain the productive potential of land in the District, including:

- 1. retaining land which is suitable for a range of primary production activities;
- achieving added economic and social value derived from primary production activities through ancillary on-site processing and marketing;
- 3. enabling activities that utilise the productive potential of the land in the rural environment;
- 4. reducing conflict between land uses in the rural environment and adjoining areas; and
- 5. avoiding, remedying or mitigating adverse *effects* on the efficient operation of existing *primary production activities* from *sensitive activities* establishing on adjoining *subject sites*;

while safeguarding the life-supporting capacity of air, water, soil, and ecosystems by avoiding, remedying or mitigating adverse *effects* on the *environment*.

### DO-O8 Strong Communities

To support a cohesive and inclusive community where people:

- have easy access and connectivity to quality and attractive public places and local social and community services and facilities;
- 2. have increased access to locally produced food, energy and other products and resources;
- have improved health outcomes through opportunities for active living or access to health services; and
- 4. have a strong sense of safety and security in public and private spaces.

### **DO-O11** Character and *Amenity Values*

Amended 01 Sep 23 PC2

To recognise the unique character and *amenity values* of the District's distinct communities, while providing for character and *amenity values* to develop and change over time in response to the diverse and changing needs of people, communities and future generations, resulting in:

- residential areas characterised by the presence of mature vegetation, a variety of built forms and building densities, the retention of landforms, and the recognition of unique community identities:
- vibrant, lively metropolitan and town centres supported by higher density residential and mixed use areas;
- local centres, village communities and employment areas characterised by high levels of amenity, accessibility and convenience;
- 4. productive rural areas, characterised by openness, natural landforms, areas and corridors of *indigenous vegetation*, and *primary production activities*; and
- 5. well managed interfaces between different types of land use areas (e.g. between living,

Page 4 of 22

working and rural areas) and between potentially conflicting land uses, so as to minimise adverse effects.

### **DO-O12** Housing Choice and Affordability

To meet diverse community needs by increasing the amount of housing that:

- 1. is of densities, locations, types, attributes, size and tenure that meets the social and economic wellbeing needs of households in suitable urban and rural locations;
- 2. is affordable and adequate for lower income households; and
- can respond to the changing needs of residents, regardless of age, mobility, health or lifestyle preference;

while enhancing the amenity of living environments and contributing to the sustainability of communities and compatibility with the goals of environmental sustainability, in particular resource, water and energy efficiency.

### DO-O13 Infrastructure

To recognise the importance and national, regional and local benefits of *infrastructure* and ensure the efficient *development*, maintenance and operation of an adequate level of social and physical *infrastructure* and services throughout the District that:

- 1. meets the needs of the community and the region; and
- 2. builds stronger community resilience, while avoiding, remedying or mitigating adverse *effects* on the *environment*.

## DO-O14 Access and Transport

To ensure that the transport system in the District:

- 1. integrates with land use and urban form and maximises accessibility;
- improves the efficiency of travel and maximises mode choice to enable people to act sustainably as well as improving the resilience and health of communities;
- contributes to a strong economy;
- 4. avoids, remedies or mitigates adverse effects on land uses;
- 5. does not have its function and operation unreasonably compromised by other activities;
- is safe, fit for purpose, cost effective and provides good connectivity for all communities;
- 7. provides for the integrated movement of people, goods and services.

## DO-O15 Economic Vitality

To promote sustainable and on-going economic development of the local economy, including the rural sector, with improved number and quality of jobs and investment through:

1.

- encouraging business activities in appropriate locations within the District, principally
  through differentiating and managing various types of business activities both on the
  basis of the activity, and the potential local and strategic effects of their operation;
- b. reinforcing a compact, well designed and sustainable regional form supported by an integrated *transport network*;
- c. enabling opportunities to make the economy more resilient and diverse;
- d. providing opportunities for the growth of a low carbon economy, including clean technology;
- e. minimising reverse sensitivity effects on business activities, including primary production activities; and
- f. enhancing the amenity of Working Zones;

while:

2.

- a. ensuring that economic growth and development is able to be efficiently serviced by infrastructure;
- encouraging commercial consolidation and the co-location of community services and facilities primarily within the *Paraparaumu Sub-Regional Centre* and *Town Centres*;
   and
- c. managing contamination, pollution, odour, noise and glare, associated with *business* activities, including *primary production activities*.

Page 5 of 22

### **DO-O17** Open Spaces / Active Communities

To have a rich and diverse network of open space areas that:

- is developed, used and maintained in a manner that does not give rise to significant adverse
   effects on the natural and physical environment;
- 2. protects the District's cultural, ecological and *amenity values*, while allowing for the enhancement of the quality of *open space* areas;
- 3. supports the identity, health, cohesion and resilience of the District's communities; and
- 4. ensures that the present and future recreational and *open space* needs of the District are met

Provisions in other chapters of the Plan may also be relevant.

## Policies

## **GRUZ-P1** Primary Production

Primary production activities will be provided for as the principal use in the District's Rural Zones where adverse effects on the environment are avoided, remedied or mitigated and the life-supporting capacity of air, water, soil and ecosystems is safeguarded.

### GRUZ-P2 Rural Character

Subdivision, use and development in the Rural Zones will be undertaken in a manner that maintains or enhances the District's rural character, including:

- 1. the general sense of openness;
- 2. natural landforms;
- 3. overall low density of development; and
- 4. the predominance of primary production activities.

## **GRUZ-P3** Planting and Harvesting of Plantation Forestry

Provide for planting and harvesting of *plantation forestry* in the Rural *Zones* where it is carried out in a manner that avoids, remedies or mitigates adverse *effects* on the *environment*.

### GRUZ-P4 Intensive Farming

Manage the design and location of *intensive farming* to avoid, remedy or mitigate adverse *noise*, odour, traffic, visual character, amenity and *nuisance effects*, including cumulative *effects*, and avoid adverse effects on Water Collection Areas.

### **GRUZ-P5** Management of Conflicting Uses

Manage the interface between activities on adjoining *sites* in the Rural Zones in order to avoid, remedy or mitigate adverse *effects* on *amenity values* and on the effective and efficient operation of rural activities.

## **GRUZ-P6** Sensitive Activities

Ensure that new *sensitive activities* establishing in the Rural *Zones* are designed and located to avoid, remedy or mitigate potential *reverse sensitivity effects* on *primary production activities*, and other lawfully established activities.

## **GRUZ-P7** Growth Management

Avoid the use of *land* in the General Rural Zone for urban development or *rural lifestyle development* where such a proposal would:

- 1. compromise the use and *productive potential* of *land* for *primary production* activities;
- compromise the District's ability to maintain a consolidated urban form in existing urban areas:
- 3. compromise the distinctiveness of existing settlements or reduce rural character values between and around settlements;
- 4. adversely affect the vitality of the District's Centre Zones;
- 5. make inefficient use of the transport network; or

Page 6 of 22

increase pressure for public services and infrastructure (including transport and community infrastructure) beyond existing capacity.

## GRUZ-P8 Adding Value to Primary Production: On-site Processing and Retailing

The ability to add value to *primary production* activities in the Rural *Zones* through *ancillary* on-site processing and *retailing* — including *roadside stalls* — will be provided for in a manner which avoids, remedies or mitigates adverse *effects* on the safety and efficiency of the *transport network* and on *amenity values* of the Rural *Zones*.

In determining whether or not the scale of *effects* from the *ancillary* on-site processing and *retailing* activity is appropriate, particular regard must be given to:

- 1. the *effects* generated by the activity on the safety and efficiency of the *transport network*;
- 2. the *effects* generated by the proposed activity on landscape character and rural values of the surrounding *environment*;
- the appropriateness in the design and total provision of proposed access and carparking; and
- 4. the extent to which any proposed screening and *landscaping* successfully mitigates potential visual impacts of the activity.

GRUZ-P9	Residential Units and Buildings (excluding minor buildings)	Amended 01
		Sep 23 PC2

New residential units (excluding visitor accommodation which is not temporary residential rental accommodation) and other buildings (excluding minor buildings) in all the Rural Zones will be provided in a manner which avoids, remedies or mitigates adverse environmental effects (including cumulative effects) on the productive potential and landscape character of the rural area, including:

- limiting the number of residential units and minor residential units to one of each per subject site, except for papakāinga and where Development Incentive Guidelines are complied with;
- 2. managing the location and scale of buildings (excluding minor buildings); and
- 3. recognising the operational requirements for *buildings* (excluding *minor buildings*) that are *ancillary* to *primary production activities*.

## GRUZ-P10 Rural Dunes Precinct

Subdivision, use and development in the Rural Dunes Precinct will be undertaken in a manner which:

- 1. supports the *primary production* activity focus of the Rural *Zones* while protecting the valued landforms and ecological character, including dunes and *wetlands* of the Precinct;
- 2. retains an overall low density scale and intensity to retain an overall rural character;
- 3. avoids activities, such as *industrial*, *commercial* or *retail activities* which are not *ancillary* activities to primary production activities;
- 4. ensures sensitive areas and areas of visually sensitive *open space* in the Rural Dunes Precinct are protected;
- clusters development in areas characterised by undulating topography where the development can be accommodated in a sensitive manner, with minimal disruption to natural landform;
- locates buildings and other structures in a way which avoids adverse visual and landform effects on dominant dune ridges;
- 7. provides areas which are capable of accommodating a *primary residential building* which is not at *risk* from identified *natural hazards*; and
- 8. encourages increases in biodiversity, water quality and energy efficiency.

GRUZ-P11	Rural-Eco Hamlet Precinct	Amended 01
		Sep 23 PC2

*Subdivision*, use and *development* in the Rural Eco-Hamlet Precinct must be undertaken in accordance with *structure plans* approved by way of changes to the District Plan, and be consistent with the following principles:

- ensure that eco-hamlets and associated buildings (excluding minor buildings) are designed and located to minimise landform modification;
- 2. buildings, roads and structures are located so that they minimise disturbance to the existing

Page 7 of 22

landforms and natural features including general contours and prominent landforms, areas of native bush, *wetlands*, streams and their margins;

- 3. *buildings* (excluding *minor buildings*) are designed and oriented to maximise *water* and energy efficiency while ensuring public health is maintained;
- 4. the use of renewable electricity generation activities is encouraged;
- 5. building design / building form reflects local character;
- open space and rural character are protected and enhanced by maintaining an appropriate overall low density and ratio of development intensity to open space;
- 7. consideration is given to minimising light pollution;
- 8. the *productive potential* of rural land is maintained through the retention of larger balance area *allotments*;
- 9. any *development* is designed to create a sense of community and to provide a safe and accessible *environment* for pedestrians and cyclists;
- 10. *stormwater* treatment and management systems are designed to integrate into the landscape to minimise *stormwater* runoff resulting from *development*;
- 11. any development and subdivision ensures that individual allotments are landscaped and planted in a manner that: reduces the visual bulk of buildings (excluding minor buildings); integrates buildings (excluding minor buildings) into the landscape; provides shade and windbreaks; and maintains visual privacy;
- 12. limits linear planting, including hedges and shelter belts, along site boundaries;
- 13. maintains sufficient separation distance between vegetation and *regionally significant infrastructure*;
- 14. any *development* maintains the ecological health of *waterbodies*, *wetlands* and aquatic habitats, and retains and enhances blue and green corridors (waterways and native bush areas) as a feature of the *zone*;
- development provides for walkable communities with generous provision for walking, cycling and horse riding trails, including non-motorised access along watercourses and open space areas; and
- 16. buildings (excluding minor buildings) and subject site accesses are designed and built so that they are free from flooding. Design solutions must, where possible, use soft engineering to be consistent with the Land Development Minimum Requirements.

This policy does not apply to papakāinga.

### GRUZ-P12 Ngārara Precinct

Ensure that *development* in the Ngārara Precinct enables connections to and integration with other *land* in the Rural Eco-Hamlet Precinct, incorporates the principles outlined in GRUZ-P11, is developed in accordance with the Ngārara Precinct Structure Plan (Appendix 10) and Ngārara Precinct Management Principles (Appendix 11) and is consistent with the following principles:

- efficient use is made of infrastructure and other services provided in conjunction with more concentrated rural living zones; and
- any development is designed to provide for a high degree of social and amenity value in the Residential Zones, both within the subject site(s) and wider neighbourhood/community. The provision of affordable housing is encouraged.

### GRUZ-P13 Kāpiti and Outer Islands

Subdivision, use and development on Kāpiti Island and the outer islands will be undertaken in a manner and at a rate that:

- 1. minimises adverse visual impact, including through:
  - use of building materials and colours which are sympathetic to the island's natural character and to its high visibility from the coast;
  - b. the use of screening and landscaping;
  - c. limiting the scale and duration of earthworks; and
  - d. limiting building density (excluding minor buildings);
- ensures any new land use activity will be self-sufficient (with respect to necessary servicing) and energy-efficient;
- 3. protects Kāpiti Island's cultural, wildlife, ecological and heritage values; and
- 4. supports Kāpiti Island's primary role as a nature reserve.

### GRUZ-P14 Tourism

Page 8 of 22

Enable tourism activities that complement *primary production* activities in the Rural *Zones* and contribute to the vitality and resilience of the District's economy, while avoiding, remedying or mitigating adverse *effects* on the *environment*.

# Rules

GRUZ-R1	Any activity which is not otherwise specified as a <i>Permitted, Controlled, Restricted Discretionary, Discretionary or Non-Complying-activity</i> this chapter.		
Permitted	Standards		
Activity	The activity complies with all <i>permitted activity</i> standards in this chapter.		
GRUZ-R2	Pastoral and arable farming, shelter belts, outdoor (extensive) pig farming, horticulture, viticulture and orchards.		
Permitted Activity	Standards  1. Shelter belt vegetation which will grow to a height of more than 6 metres		
	must not be planted:		
	a. within 10 metres of any <i>waterbody</i> whose <i>bed</i> has an average width of 3 metres or more;		
	<ul> <li>b. within 30 metres of a lawfully established <i>primary residential building</i> on an adjoining <i>site</i> under separate ownership;</li> <li>c. within 10 metres of any legal <i>boundary</i> of any <i>allotment</i> held under a separate Record of Title except where land within an adjoining <i>property</i> in close proximity to the legal <i>boundary</i> of the <i>allotment</i> is in the same ownership; or</li> <li>d. within 10 metres of any <i>road boundary</i>.</li> </ul>		
	<b>Note:</b> See the Natural Environment Values, Coastal Environment and Historic and Cultural Values chapters for additional rules and standards applying to the planting of shelter belts or plantation forestry within ecological sites, outstanding natural features and landscapes, geological features or historic heritage features.		
GRUZ-R3	Buildings and structures:		
	a. including habitable buildings and accessory buildings on any allotment.		
	Qualifying criteria, and measurement criteria apply to some activities under this rule.		
Permitted	Standards		
Activity	<ol> <li>The maximum number of residential buildings on any subject site shall be one residential unit (excluding visitor accommodation which is not temporary rental accommodation) and one minor residential unit (except on Kāpiti Island and the outer islands which have specific requirements). The maximum total floor area for a sleep out shall be 30m<sup>2</sup>.</li> </ol>		
	Qualifying Criteria:		
	In order to be self-contained a <i>minor residential unit</i> must contain a <i>kitchen</i> and <i>bathroom</i> . A <i>minor residential unit</i> has a <i>gross floor area</i> which is no greater than 60m <sup>2</sup> .		
	Measurement Criteria:		
	When measuring the number of <i>residential units</i> , the <i>residential unit</i> measurement criteria must be followed. When measuring gross floor area for the purposes of a minor residential unit, include:		
	a. covered yards and areas covered by a roof but not enclosed by walls		

Page 9 of 22

### Exclude:

- a. decks and covered outdoor living spaces;
- b. uncovered stairways;
- c. floor space in terraces (open or roofed), external balconies, breezeways or porches;
- d. car parking areas; and
- e. floor space of interior balconies and mezzanines not used by the public.
- 2. The maximum height from original ground level of any:
  - a. accessory farm building or structure (excluding minor buildings) shall be 10 metres
  - b. habitable building shall be 8 metres
  - building or structure (excluding minor buildings) on Kāpiti Island shall be 8 metres
- 3. No *buildings* or *structures* (excluding *minor buildings*) within 500 metres of the inland edge of a *beach* shall be visible from *the beach* when measured from 1.5 metres vertically above *ground level* at a point 20 metres seaward from the seaward toe of the foredune.
- 4. No sensitive activities shall be located within 300 metres of a building or enclosure containing a lawfully established intensive farming activity, or within 300 metres of a lawfully established extractive industry.
- 5. The minimum yard requirements for any subject site shall be:
  - a. front yard
    - i. all *buildings* and *structures* (excluding *minor buildings*) must be set back at least 10 metres from a *road boundary*; and
    - ii. intrusions of eaves up to 0.6 metres are excluded.
  - b. side and rear yards
    - i. all buildings and structures (excluding minor buildings and intensive farming buildings) must be set back at least 5 metres from a side or rear yard boundary; and
    - ii. intrusions of eaves up to 0.6 metres are excluded.

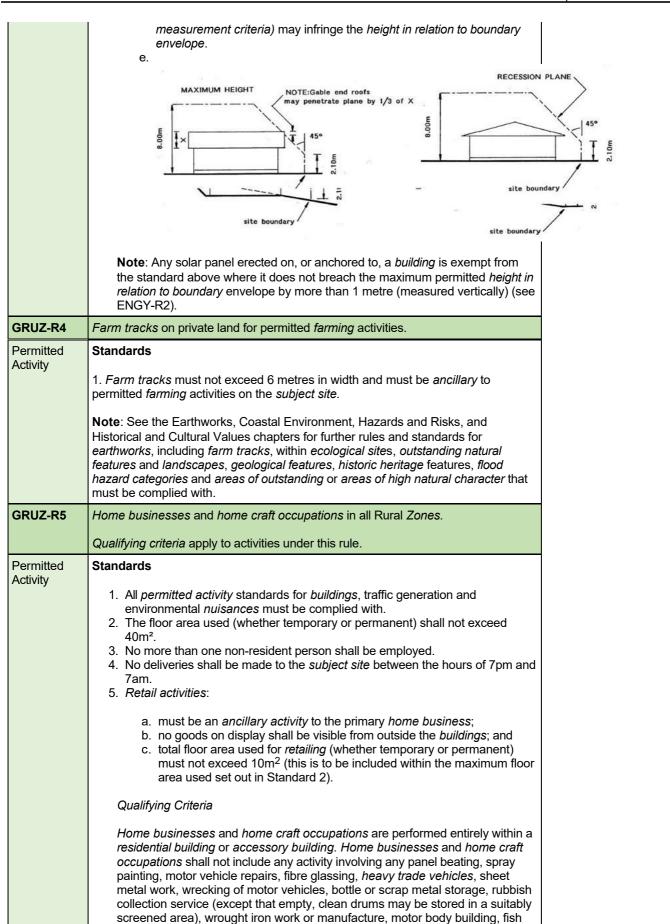

**Note**: For *intensive farming* standards refer to the *Restricted Discretionary Activity* Standards.

All parts of *buildings* and *structures* (excluding *minor buildings*) must fit within a *height in relation to boundary envelope* which is made up of recession planes which commence at a point 2.1 metres above the *original ground level* at the *site boundary* and inclines inwards at an angle of 45 degrees. (refer to definition of *height in relation to boundary* and diagrams in the Definitions chapter).

### Measurement Criteria:

- a. The height in relation to boundary envelope must be measured from a
  point above the original ground level at the boundary (including
  restrictive covenant areas of cross lease properties).
- b. Residential chimneys, electricity transmission towers, masts, radio, television and telecommunication antenna and aerials are excluded from the *height in relation to boundary*
- c. Where there is a right-of-way or an access strip/leg adjoining the allotment boundary, the height in relation to boundary envelope shall be measured from a point 2.1 metres above a point midway across the right-of-way or access strip/leg.
- d. Garages located in the side or rear *yard* up to 7 metres in length and not more than 2.4 metres in *height* (as determined by the *height*

Page 10 of 22 Print Date: 08/04/2025

Page 11 of 22 Print Date: 08/04/2025

	processing, breeding or boarding of dogs or cats, <i>visitor accommodation</i> or any process which involves repetitive use of power tools, drills or hammering or any <i>business activity</i> , trade, craft or profession which creates a <i>nuisance effect</i> at or beyond the <i>boundary</i> of the <i>property</i> on which the activity is occurring, and does not include <i>temporary residential rental accommodation</i> .		
GRUZ-R6	Activities on Kāpiti Island and off shore islands.		
	Residential unit measurement criteria apply to some activities under this rule.		
Permitted Activity	Rubbish Disposal:     Apart from matter that is biodegradable, all other waste material must be removed from the island.		
	<ol> <li>Fire Safety:         <ul> <li>A firefighting water supply method designed to protect human life and property on the island from fire is required. An operational high-delivery pump and hose (capable of reaching all dwellings) must be able to be connected either to seawater or to a fire water storage tank of minimum 4,500 litres capacity.</li> </ul> </li> <li>Rodents/Mustelids/Animals:         <ul> <li>Adequate provision must be made to ensure rodents and mustelids are not able to gain access to the island. No animals are permitted except for animals used for wildlife management purposes, or authorised for release on the island by the Department of Conservation.</li> </ul> </li> </ol>		
	4. Household units: A maximum of 16 residential units (excluding visitor accommodation which is not temporary residential rental accommodation) are permitted to be located on Kāpiti Island and off-shore islands. They must be designed to not be visible from the beach and must be of recessive colours or materials. The residential units must comply with all permitted activity standards for permitted buildings in GRUZ-R3 above.		
	The number of residential units must be determined with the residential unit measurement criteria.		
	5. <b>Buildings</b> New buildings (excluding minor buildings) and additions must be located on land identified as an area of high natural character. No additional buildings (excluding minor buildings) shall be located on land identified as an area of outstanding natural character.		
GRUZ-R7	Buildings and development in the Rural Eco-Hamlet Precinct and the Ngārara Precinct.		
Permitted	Standards		
Activity	<ol> <li>Development is consistent with the Structure Plan for the Waikanae North Eco-Hamlet (Appendix 12) or Ōtaki North Eco-Hamlet (Appendix 13) or Ngārara Precinct (Appendices 10 and 11). Development must be located within the areas shown as suitable on the (Waikanae North (Appendix 12) and Ōtaki North (Appendix 13) Structure Plans and the defined areas in the Ngārara Precinct Structure plan (Appendix 10).</li> <li>Roading infrastructure and new and relocatable buildings or structures must be located:</li> </ol>		
	<ul> <li>a. outside buffer areas adjoining ecological sites, streams, expressway and transmission lines as identified on the structure plan, except for structures associated with passive recreation and conservation activities; and</li> <li>b. outside the visually sensitive areas and visually sensitive ridgelines as</li> </ul>		

Page 12 of 22 Print Date: 08/04/2025

identified on the structure plans (Appendices 10, 11, 12 and 13).

- 3. Individual allotments must be landscaped and planted to:
  - a. visually reduce the bulk of buildings (excluding minor buildings);
  - integrate the *building* form into the landscape (excluding *minor buildings*);
  - c. provide shade and windbreaks;
  - d. protect or maximise visual privacy;
  - e. limit linear planting including hedges and shelter belts;
  - f. maintain sufficient separation distance between vegetation and *transmission lines*; and
  - g. additional requirements for the Ngārara Precinct:
    - i. planting shall provide filtered views of buildings (excluding minor buildings) so that no more than 50% of building to be visible 5 years after building completion when viewed from streets and public areas; and
    - ii. no hedges, shelter belts and other linear planting with a length exceeding 10 metres shall be included in landscaping on allotments.
- 4. Buildings and structures (excluding minor buildings) within individual allotments must be located so that:
  - a. all buildings and structures are clustered;
  - residential dwellings are orientated to the north with a minimum of 50% of the northerly facing wall being glazed (i.e. windows or glazed doors) to maximise energy efficiency and sun access;
  - buildings and structures (other than intensive farming buildings for which greater setbacks are required) must be sited at least:
    - i. 10 metres from the *road boundary* and 5 metres from external boundaries;
    - ii. 10 metres from streams/waterbodies and ecological sites identified on the Structure Plans in Appendices (10, 11, 12 and 13);
    - iii. 5 metres from all other streams/drains; and
    - iv. comply with setback distances from National Grid transmission lines, support structures and poles in INF-MENU.
- 5. A *subject site* layout plan must be provided with the Building Consent application which shows the following:
  - a. the location of all dwellings, *accessory buildings* and *structures* (excluding *minor buildings*) on-site;
  - b. proposed *driveway*;
  - c. earthworks; and
  - d. any proposed planting.
- Any building or fence constructed or clad in metal, or material with reflective surfaces, must be painted with a non-reflective finish and be at least 50% visually permeable. For the avoidance of doubt glazing is excluded from this standard.
- 7. Ancillary buildings and structures must have a combined total floor area of no greater than 150m<sup>2</sup> per allotment.
- 8. The keeping of a domestic cat(s) within 500 metres of protected *ecological* sites is not permitted unless the cat(s) are kept within a cat run.

GRUZ-R8	Papakāinga on land held under Te Ture Whenua Māori Act 1993.	Amended 01 Sep 23 PC2
Permitted Activity	Standards	
	1. Buildings and structures must comply with the Standards set of	ut under Rule

Page 13 of 22 Print Date: 08/04/2025 General Rural Zone Operative: 08/04/2025 GRUZ-R3, except for Standards 1 and 3; 2. Where the papakāinga is located on Kāpiti Island or an offshore island, it

must comply with the Standards set out under Rule GRUZ-R6;

3. The gross floor area of all commercial activities must not exceed the lesser

  - b. any other matter related to tikanga Māori.

GRUZ-R12	[Deleted] Deleted 01 Sep 23 PC2			
GRUZ-R13	All buildings and activities in the Kukutauaki and Kawakahia Eco-Hamlet areas of the Ngārara Precinct.  Height measurement criteria apply to activities under this rule.			
Restricted Discretionary Activity		1. All dwellings and structures in the Kukutauaki Eco-Hamlet area must be setback from the boundary of the adjoining allotments in Rutherford Drive by at least 10 metres and not exceed 8 metres in height (as measured by the height measurement criteria).  2. Resource consent for development in the Kukutauaki Eco-Hamlet area must demonstrate that:	1. <i>Eff</i> e	

Page 17 of 22

 a. a minimum 50 metre Open Space Wetland Buffer area is incorporated around ecologically sensitive Kawakahia wetlands (extent of this is shown on the Structure Plan);

- adverse effects on indigenous flora and flora values and the ecological health of the ecological sites are avoided or mitigated;
- c. ownership and management structures for the Eco-Hamlet area are defined and include all open space;
- d. an Environmental Management Plan is prepared that complies with Appendix 10 and Appendix 11;
- e. individual building platforms (excluding those for minor buildings) and associated services are identified within each allotment;
- f. roading infrastructure and development of house allotments are located outside buffer areas sensitive to existing dune topography and involves minimal earthworks:
- g. waste control structures are fully contained to ensure no leakage or groundwater infiltration;
- h. all *stormwater discharges* are appropriately treated prior to *discharge* to ground on-site.
- i. development within Kawakahia Eco-Hamlet area that adjoins the Kawakahia Wetland (K066) must meet the following:
  - i. an Open Space Wetland Buffer no less than 20 metres in width shall be established around wetlands and streams, a 50-metre minimum buffer is required for those areas shown as "Open Space Wetland Buffer (50m buffer)" on the Ngārara Precinct Structure Plan (Appendix 10) subject to an ecological assessment determining whether a wider buffer is required;
  - ii. for wetland buffers less than 50 metres in width, a 10-metre building setback (excluding minor buildings) from the inland boundary of the buffer is required: for wetland buffers 50 metres or greater in width, no building setback is required;
  - iii. no structures within Open Space Wetland Buffers except for structures associated with passive recreation and conservation activities:
  - iv. an Environmental Management Plan is prepared that complies with Appendix 10 and 11 and sets out the management structure for open space areas;
  - v. all wastewater must be reticulated and all waste control structures shall be fully contained to ensure no leakage or groundwater infiltration;
  - vi. no untreated *stormwater* shall be discharged to natural *wetlands*
  - vii. all *stormwater discharges* are appropriately treated prior to *discharge* to ground on-site;
  - viii. individual *building* platforms within each *allotment* and associated services are defined; and
  - ix. locally sourced indigenous species must be used for all planting.

North and Ōtaki North Eco-Hamlet Precinct.

Sep 23 PC2

This rule does not apply to papakāinga development.

Height measurement criteria apply to activities under this rule.

Development within the Visually Sensitive Areas of the Waikanae

Restricted Discretionary Activity

**GRUZ-R15** 

### **Standards**

- Compliance with the Permitted Activity Standards for development in the General Rural Zone and the Waikanae North and Ōtaki North Eco- Hamlet Precinct.
- All buildings (excluding minor buildings) to use as exterior materials:
  - a. natural stone; or
  - natural timber provided any stains and protectants used do not contain colorants to change the natural colour of the timber (for example, to green or red); or
  - another material painted or finished in visually muted, *recessive* colours, from British Standard 5252 A01 to C40 inclusive, with a reflective value of 60% or less.
- Any building (excluding minor buildings) or fence constructed or clad in metal, or material with reflective surfaces, must be painted or otherwise coated with a nonreflective finish and be at least 50% visually permeable. For the avoidance of doubt glazing is excluded from this standard.
- Buildings (excluding minor buildings) must be no more than 6 metres in height (as determined by the height measurement criteria).

Matters of Discretion

Amended 01

- Ecological
   or
   biodiversity
   effects
- 2. Layout, size, design and location of proposed building and structures.
- 3. Visual, character and amenity effects.
- 4. Adequacy
  of
  subject
  site investigations.
- 5. Suitability of the subject site for the proposed activity.

6. Proposed

- mitigation, remediation or ongoing management measures.
- 7. Cumulative effects.
- 8. Effects
  on
  natural
  character
  in
  the
  coastal
  environment.

GRUZ-R16

Any activity listed as a *restricted discretionary activity* in this chapter that does not comply with one or more of the associated standards.

Discretionary

Page 21 of 22

Activity		
GRUZ-R17	New roadside stalls/retail outlets fronting State Highway 1 or roads when volumes exceed 10,000 vpd.	nere traffic
Non- Complying Activity		
GRUZ-R18	Commercial helicopter operations.	
Non- Complying Activity		
GRUZ-R19	Second or subsequent residential units (excluding visitor accommodation which is not temporary residential accommodation, or papakāinga) on any allotment.  Measurement Criteria The number of residential units must be determined using the residential unit measurement criteria.	Amended 01 Sep 23 PC2
Non- Complying Activity		
GRUZ-R20	Industrial, retail or commercial activities in all Rural Zones which are not:  a. a home business, home craft occupations, homestay or an ancillary activity to a primary production activity on the subject site; b. an extractive industry on the site; or c. ancillary to and located within a papakāinga.  Qualifying criteria apply to home businesses and home craft occupations. Refer to GRUZ-R5.	Amended 01 Sep 23 PC2
Non- Complying Activity		
GRUZ-R21	New <i>roads</i> including associated <i>infrastructure</i> and new and <i>relocatable buildings</i> or <i>structures</i> within the Visually Sensitive Areas of the Waikanae North Eco-Hamlet Precinct that do not comply with the <i>restricted discretionary activity</i> Standards in GRUZ-R15	
Non- Complying Activity		
GRUZ-R22	New <i>roads</i> including associated <i>infrastructure</i> and new and <i>relocatable buildings</i> or <i>structures</i> which are located up to 3 metres below or are above the Visually Sensitive Ridgelines (as identified on the <i>structure plans</i> for the Waikanae North Eco-Hamlet Precinct and the Ōtaki North Rural Eco-Hamlet Precinct in Appendix 12 and Appendix 13.	
Non- Complying Activity
