Soft Plastics Drop-Off

Soft plastics - any plastic packaging that can be scrunched into a ball!

For soft plastics to be recycled, they need to be collected separately to your kerbside recycling. Otherwise they tangle and damage sorting plant equipment that is designed to process hard plastic, such as bottles and containers.

Visit www.kapiticoast.govt.nz/waste to find out how to reduce your soft plastics or go to www.recycling.kiwi.nz/store-locator to find a drop-off point at one of your local supermarkets.
