Scope of submission

Submission

My submission is: *[include whether you support or oppose the specific provisions or wish to have them amended; and reasons for your views]*

While the table details the components I can not see any supporting narrative to determine how this will be ascertained (e.g in terms of utility monitoring and impact analysis of any specific development). Under the proposal there is a possibility of pockets of relatively med - high density housing relying on access to existing infrastructure that was never designed to cater for this eventuality. How is the council going to control this? The council already has infrastructure at risk because of its position in flood/storm prone areas. From memory currently the councils GIS system has a layer indicating water flood levels - can the council guarantee to reject any development that would lead to houses being build in a flood prone area?

Continue on a separate sheet if necessary

I seek the following decision from the Kāpiti Coast District Council: *[give precise details]*

Confirmation that no development under this new regime will be approved in any area that possible flooding may render the use of the land impractical

Confirmation that developers will pay for any upgrade to any component of Council facilities required to service the development (ie water, storm-water, sewage, roading, provision of electricity and gas
