Chairperson and Committee Members AUDIT AND RISK COMMITTEE

30 NOVEMBER 2017

Meeting Status: Public

Purpose of Report: For Information

REGULAR PROGRESS UPDATE ON KEY 2014/15 AUDIT FINDINGS

PURPOSE OF REPORT

This report provides an update on progress in relation to addressing Ernst & Young (Audit) Report on Control Findings for the year ended 30 June 2015 relating to the implementation of improvements to the IT general system security settings.

DELEGATION

- The Audit and Risk Committee has delegated authority to consider this report under the following delegation in the Governance Structure, Section B.3.
 - Reviewing and maintaining the internal control framework.
 - Obtaining from external auditors any information relevant to the Council's financial statements and assessing whether appropriate action has been taken by management in response to the above.

BACKGROUND

- The Ernst & Young Control Findings for the year ended 30 June 2016 included an open control finding for the year ended 30 June 2015. Those findings, the Council response and a summary of progress to date are listed below:
- 4 Ernst & Young identified a moderate risk issue with the implementation of improvements to the IT general system security settings. They recommended "Council's IT security practices to be based on the New Zealand Information Security Manual (NZISM)".
- Council responded that it agreed with the recommendations and that plans are underway to engage an external consultant to conduct a wide ranging audit including a general IT architecture review. The recommendations arising from these audits will provide detailed information on both ICT Strategy and general IT security and will form the basis of the implementation for improvements as a priority item. The action recorded was that process and policies based on the NZISM will be created and regularly reviewed.
- Since this Committee met on 27 April 2017 the IT system security project has commenced with phases 1, 2, 6, 7 and 8 in progress and phases 1, 3, 4 and 5 having been completed.

CONSIDERATIONS

- 7 As reported on 27 April 2017, the project scope was to deliver:
 - documentation to confirm the responsibilities of the various roles involved in Information Security;
 - appropriate education channels and material to maintain and enhance information security awareness;
 - necessary changes to the related organisations policies, processes and procedures to ensure their alignment of the NZISM identified controls;
 - a risk assessment for each of the information systems and services identified as 'critical',
 - appropriate risk treatment for any 'critical' risks associated with 'critical' systems or services; and
 - implement a suitable tool to assist with the assessing, managing and reporting on the state of NZISM compliance.
- 8 Progress to date against each project phase is as follows:

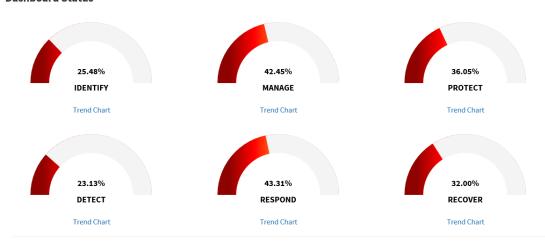

Phase	Action	Description	Status – (November)
Phase 1 June-July 2017	Agree the baseline	Review current state and identify controls, policies, processes and procedures related to the identified controls, and critical systems, infrastructure, processes and information.	Completed – the assessment of existing policies, processes and procedures for critical systems has been completed.
Phase 2 June-July 2017	Confirm SLT Support	Confirm and document the Information Security Policy and associated roles / responsibilities and brief SLT.	In Progress – a review and assessment of existing information security policies has been completed. Options to improve policies are being considered and a recommendation will be made to SLT.
Phase 3 May-July 2017	Implement Roles and Responsibilities	Allocate roles for the 'priority' systems and processes and implement those roles and responsibilities, along with supporting material.	Completed – the roles and responsibilities have been setup and are managed through the SAM for Compliance tool (see Phase 4).
Phase 4 May-July 2017	Implement Compliance Tool	Implement populated compliance tool. This will allow reporting on current level of compliance and tracking of actions against the work programme.	Completed – purchase of SAM for Compliance software that will allow IT staff to assess, manage, improve, track and report against critical security controls. The assessment phase started in September.

Phase	Action	Description	Status – (November)
Phase 5 July-Sept 2017	Align Current Work Programme and Business as Usual	 Review ICT Work Programme projects related to increasing IT security and ensure alignment with controls and intended baseline. Ensure project and business as usual processes are aligned to baseline and ongoing increasing of security. 	Completed – assessment of the existing and planned ICT Work programme projects to ensure alignment with critical security controls has been completed.
Phase 6 Aug-Nov 2017	Increase Security Awareness	-Identify appropriate education channels and develop educational material to maintain and enhance Information Security AwarenessImplement Information Security Awareness Programme.	In Progress – options for staff educational material and awareness are being considered, likely electronic delivery channel will be via the Council intranet supplemented with posters on noticeboards.
Phase 7 Mar-April 2018	Perform Risk Assessments	-Treat Risks for 'Critical' SystemsEstablish and implement risk treatmentsDevelop security risk management plansEnsure risks for 'Critical' Systems identified and under treatment	In Progress – the risk assessment phase began in September with any critical risks being treated immediately as they are discovered.
Phase 8 Mar-June 2018	Ernst and Young Review	-Engage Ernst and Young to audit controlsEnsure appropriate controls in place to allow change of audit approach.	In Progress – have contacted Ernst & Young to arrange an audit of these controls in April/May 2018 depending on availability, awaiting confirmation of date.

- 9 SAM for Compliance is a web application tool based on the Centre for Internet Security (CIS) Critical Security Controls. The SAM tool contains approximately two hundred security controls and assists with management of compliance against those security controls. There are six phases of compliance:
 - Assess assists to help understand existing security controls that are in place.
 - Track trend graphs are used to view improvement in compliance over time.
 - View a web based dashboard provides visual updates on the level of compliance for each function.

- Report provides reports on security compliance.
- Tasks assign tasks to individuals and monitor their completion.
- Actions identify where action is required to improve compliance.
- The dashboard status report shows the level of progress to the end of October as work continues through the assessment and treatment phases of the project. As the bar of the dial moves to the right it will change from red to yellow and finally green as a higher level of compliance is achieved.

Dashboard Status

Policy considerations

- 11 There are no policy considerations at this time.
- One of the key outputs arising from the improvements to the IT general security system settings will be the development of Information Security and Management Policies. These will articulate the Council's approach to IT security and will be reviewed annually to ensure that any changes to the Council's IT environment are appropriately reflected.

Legal considerations

In accordance with the Principles for Managing Data and Information, held by the New Zealand Government and approved by Cabinet on 8 August 2011 (CAB Min (11) 29/12) – government data and information should be open, readily available, well managed, reasonably priced and re-usable unless there are necessary reasons for its protection. Personal and classified information will remain protected. Government data and information should also be trusted and authoritative.

Financial considerations

The main financial considerations are internal costs for Project Management / Business Analyst time, the external costs of the SAM compliance tool and for Ernst & Young to review the Council responses to all five of the original ITGC findings. The costs for this project are being met from existing ICT budgets.

Tāngata whenua considerations

15 There are no tāngata whenua considerations.

SIGNIFICANCE AND ENGAGEMENT

Degree of significance

16 This matter has a low level of significance under the Council Policy.

Publicity

17 There are no publicity considerations at this stage.

RECOMMENDATIONS

That the Audit and Risk Committee notes the progress made to address the Ernst & Young's Control Finding for the year ended 30 June 2015 relating to IT general system security settings – the review and assessment phases of the project are on track as per the project timeline.
