CHECKSHEET: MULTI RESIDENTIAL, INDUSTRIAL OR COMMERCIAL BUILDINGS

Kapiti Coast District Council, 175 Rimu Road, Paraparaumu 5032 Private Bag 60601, Paraparaumu 5254 For enquiries, phone 04 296 4700

Address of Project:	

This checksheet shows you the information that has to be supplied with your building consent application. Please attach **1 copy** of the following information with your completed Building Consent Application form.

Where the project falls within the prescribed parameters for referral to the Fire and Emergency New Zealand for comment, a third copy of the plans and the fire report may be required.

Please tick each relevant box in the Customer Use column as you attach the information. If the box is not relevant to your application, write **NA** across the box. Please check each section carefully and complete those sections that are relevant to your project.

Once you have attached all the required information, please check for completeness as an incomplete application or lack of any supporting information will mean that your application cannot be accepted for processing.

Use Complete this section for all applications Use Only	0		OFNEDAL	F O#:
a Building Consent Application Form Completed and signed by the owner or by an agent on behalf of the owner. b Proof of ownership One recent copy of current Record/s of Title (not older than 3 months) AND purchase agreement where applicable OR relevant portions of current lease. c Locality Plan (1:500) showing: Physical location of the subject building in relation to streets or landmarks, north point, name of building and lot and DP number. d Inspections and monitoring: Details of proposed inspection regime including monitoring by council officers and other professionals e.g. architects, engineers, surveyors and certification to be supplied on completion. e Application Fee Applications will not be accepted without payment of the appropriate fees. Fees payable are set out in the published fee schedule of the council that has jurisdiction over the project site. f Site Plan (1:100) showing: Dimensions of all boundaries, north point, finished floor levels, site area, street name and number, lot and DP number, outline of building, distance to boundaries and the position of swimming or spa pools, ground contours (extended to boundaries) and/or levels and designated wind zone of the site (e.g. specific design, very high, high, medium or low). In addition, if a site is identified as being subject to flooding, ponding, on an overflow path, river or stream corridor, or other natural hazards, indicate on plans proposed design will mitigate natural or created hazards. Additional information is available on these sites by request from Kapiti Coast District Council. 2 EXISTING BUILDING Complete for all existing buildings a Existing floor plan (1:1001:50) showing: • dimensions of internal floor plate • location and dimension of lift and lift car • location and dimensions of exit stairs • exit door sizes	Customer	1	GENERAL Complete this section for all applications	For Office

stream corridor, or other natural hazards, indicate on plans proposed design will mitigate natural or created hazards. Additional information is available on these sites by request from Kapiti Coast District Council. EXISTING BUILDING Complete for all existing buildings a Existing floor plan (1:100/1:50) showing:			,	
created hazards. Additional information is available on these sites by request from Kapiti Coast District Council. EXISTING BUILDING Complete for all existing buildings Existing floor plan (1:100/1:50) showing: dimensions of internal floor plate location exits location and dimension of lift and lift car location and dimensions of exit stairs exit door sizes				
District Council. EXISTING BUILDING Complete for all existing buildings a Existing floor plan (1:100/1:50) showing:				
EXISTING BUILDING Complete for all existing buildings a Existing floor plan (1:100/1:50) showing:				
Complete for all existing buildings a		2		
 dimensions of internal floor plate location exits location and dimension of lift and lift car location and dimensions of exit stairs exit door sizes 		_		
 location exits location and dimension of lift and lift car location and dimensions of exit stairs exit door sizes 		а	Existing floor plan (1:100/1:50) showing:	
 location and dimension of lift and lift car location and dimensions of exit stairs exit door sizes 			·	
 location and dimensions of exit stairs exit door sizes 				
exit door sizes				
			exit door sizes location and dimension of toilets and cleaners sink	

	b	Existing fire protection plan (1:100/1:50) showing:	
		All specified systems.	
	С	Means of Escape From Fire Assessment of means of escape for the whole building including floor plans showing egress routes	
		to safe place. The assessment must incorporate a statement that the assessor is suitably	
		experienced / qualified and has carried out a site inspection as part of the assessment.	
	d	Accessibility (for buildings/uses listed in Schedule 2 of the Building Act 2004)	
	J	Assessment of access and facilities for people with disabilities for the whole building. The	
		assessment must incorporate a statement that the assessor is suitably experienced / qualified and	
		has carried out a site visit inspection as part of the assessment.	
	е	Application for Discretion re Upgrades (pursuant to section 112(2) of the Building Act 2004)	
		including	
		Supporting information as to why the project would not proceed if the building was required to	П
		comply.	
		 Description of improvements proposed related to means of escape from fire and access and facilities for people with disabilities. 	
	3		
		CHANGE OF USE	
Comp	olete f	or existing buildings where the proposal will change the established use of all or part of the buil	ding
	а	Fire assessment	
		In addition to the assessment of means of escape, documentation must also include assessment of	
		the whole building for structural stability in fire and protection afforded to other sleeping areas and	
	b	other property. Structural assessment	
	b	Assessment against non-specific codes (NZS 3604 and NZS 4229) or engineering assessment	
		included as part of the structural specific design.	
	С	Sanitary facilities	
		Assessment of existing facilities within the building comparative to current code and levels of	
		amenity provided by the Acceptable Solutions.	
	d	Additional household units	
		An assessment of the building is required with respect to all Building Code clauses. If the proposal is	
		for the project to meet anything less than full compliance with any clauses of the building code, your	
		application must clearly state your reasoning, with supporting documentation, and show how you will meet the highest level of compliance that can be considered reasonably practicable.	
	4	ACCESSIBILITY	
	4		
		Complete for all buildings with uses listed in Schedule 2 of the Building Act 2004	
	а	Access and facilities for the disabled (1:100/1:50) for the whole building showing:	
		access routes accessible tellet compartment	
		 accessible toilet compartment location and height of fittings (toilet pan, basin, urinal, shower) handrails on both sides 	
		width of access routes	
		dimensions of toilet compartment	
		lift car controls	
		accessible stairs	
		accessible low height counters (including reception)	
		accessible car parks (for new buildings)	
	b	Reasonably practicable	
		Your proposal is required to fully comply with the Building Code. Where upgrading to fully comply	П
		with the Building Code for the above is not proposed you are required to supply supporting	
		documentation making the case as to why it is not reasonably practicable to do so.	
	5	FOUNDATIONS / FLOOR	
		Complete for all buildings or existing buildings with new foundations or altered footprint	
	а	Site Plan (1:100) showing	
		Dimensions of all boundaries, north point, finished floor levels, ground contours (extended to	
		boundaries) and/or levels, site area, street name and number, lot and DP number, outline of building	Ш
		and distances to boundaries. Include on the site plan the designated wind zone of the site (e.g. specific design, very high, high, medium or low).	
		personal acting in tory ringing meanant or tory.	

b	Foundation plan (1:100/1:50) showing:	
	dimensions of all new foundations	
	sub-floor, including bracing	
	footing details including reinforcing and connections	
	if a concrete slab, show basic details including reinforcing and contraction joints	
	piles and footings including reinforcing and connections	
	indicate ventilation to sub floor spaces	
	if the addition is an upper storey, show detail on upgrading existing foundations, piles, etc.	
С	Subfloor bracing	_
	Provide subfloor bracing plan and calculations for all piled structures. Where the structure is	Ш
	specifically engineered, this should be included with the structural calculations.	
d	Foundation details	
	Sections and details including reinforcing and connections.	
6	CONSTRUCTION	
Col	mplete for all new buildings and for projects with existing walls removed or new walls added	
а	Proposed floor plans (1:100/1:50) showing:	
	location of partitions	
	room dimensions	
	all designated spaces	
	plan of complete floor showing where work is to take place	
b	Bracing plan (1:100/1:50) showing:	
	bracing details and calculations for wall bracing	
	location, type and number of bracing elements	П
	if the bracing was specifically designed by a structural engineer, provide calculations (required	_
	for specific design wind zones and lateral distribution of upper floor loads where lower storey	
	bracing is provided in walls beyond the upper storey footprint).	
С	Sections and details (1:50/1:20/1:10) showing:	
	stairs, handrails, decks and decking	
	insulation systems and materials to floors, walls and roof Description of the form follows: Consider the system of the constant of the	
	 barriers providing safety from falling. Specific design required where detail does not comply with NZBCB1/AS2. 	
	 details of fire rated partitions from floor to underside of floor above (if more than one fire cell) details of sound rated partitions and floor/ceiling construction 	
	 framing sizes, beams, lintels, trusses including fixing and other structural items. Lintels carrying 	
	point loads require specific design	
	roof cladding, eaves, fascias, gutters, flashings to openings	
	fire rated systems on all walls in relation to boundary distance (calculations required)	
	stud heights of rooms and total height from lowest ground floor level to top of ridge	
	truss layout supported by design certificate and design of fixing details and load path to ground	
	retaining wall details e.g. type, height of retained ground, relationship to boundary, waterproof	
	membrane and proposed drainage.	
7	STRUCTURAL	
	Complete for all projects incorporating specific structural design	
_		
а	Structural calculations If any design work required the services of a structural engineer, attach 2 copies of the calculations	
	with this application along with structural drawings.	
	The calculations must be prefaced with information explaining the design philosophy and justification	Ш
	of assumptions and methodologies used in analysis.	
b	Producer statements	
_	If this application for consent relies on any producer statements certifying compliance with the New	
	Zealand Building Code, a copy must be attached with this application. (Note all structural producer	
	statements are required to have accompanying calculations.)	

	8	EXTERNAL	
Co	omple	te for all new buildings and for existing buildings where there are alterations to the external she	
	а	Elevations (1:100/1:50) showing: Accurate lines from boundary to boundary on each elevation, relevant District Plan daylight control lines, the maximum height on each elevation, location of door and window openings, fixed and opening sashes, sill heights, floor levels in relation to ground levels, exterior cladding nominated to all elevations, down pipes and spouting, ventilators to sub-floor area (suspended floors only).	
	b	Risk assessment (Risk matrix in E2/AS1 may be used) Consider exposure, design and detailing to support appropriate selection of cladding.	
	С	Cladding details Provide details around all penetrations/joinery and other junctions at a level appropriate to the level of risk.	
	d	Product certification Supply copies of product certificates relied on as compliance documents.	
	е	Alternative solutions If the proposal uses products or systems that are not covered in the Acceptable Solutions of clause E2 of the Building Code provide supporting current information including independent test results (full signed reports), case studies, expert opinion (including evidence of experience/qualification, basis for forming opinion, and statement of independence) etc to demonstrate compliance.	
	9	SERVICES	
		omplete for all projects with new installation or alteration of plumbing or drainage services.	
		lude all private drainage and water supply reticulation (services not to be vested in Council)	
	а	 Plumbing and Drainage plan (1:100) showing: (note: if you have supplied drainage details for surface water disposal on the site plan, no drainage plan is required) fixtures and fittings, hotwater system(s) nominate plumbing/drainage design to be installed if the building is more than one storey with sanitary fittings on upper floors, provide an isometric layout showing wastes, pipes and falls drainage layout with inspection bends and junctions indicated for both sewer and stormwater any other drainage on site including council mains and retaining wall field drains ventilation of sanitary rooms HVAC drawings trade waste pre-treatment system location and details of back flow prevention devices 	
	10	FIRE	
	а	To be completed for all applications. Proposed fire protection plan (1:100/1:50) showing: (if applicable) smoke alarm sprinkler system emergency lights fire alarm sounders any 'protected' path thermal (heat) detectors fire hose reels fire alarms call points 'open path' travel to exits method or systems for fire rating penetrations through or between fire cells	
	b	Fire report Discussing the philosophy behind the proposal and demonstrating compliance with the Building Code.	
	С	Alternative solutions Where the proposal is to meet the requirements of the Building Code by any means other than those covered in the Compliance Documents provide a supporting, current, signed design report including independent test results, calculations and/or computer modelling (indicating the validity of assumptions and applicability to project) consideration of various scenarios (indicating that they cover worst case scenarios) and comparison with the levels of safety offered by compliance with Acceptable Solutions. The designer must have established experience/gualifications. For alternative	

		solutions that deviate significantly from acceptable solutions, independent peer review may be required.	
	d	Reasonably practicable The proposal is required to meet full compliance with the Building Code. Where upgrading to fully comply with the fire clauses of the Building Code is not proposed you are required to supply supporting documentation, making the case as to why full compliance is not reasonably practicable.	
	11	SPECIFICATION Complete for all applications	
	а	 Specification Note: the specifications must be specific to the project and cover all aspects of the proposed work. elements of structure (size, spacing, timber treatment) plumbing and drainage materials and design that installation is to comply with wet area surfaces HVAC systems flooring slip resistance glazing Quality Assurance programmes 	
	b	External claddings For each of the following claddings provide details of the product name, manufacturer, maintenance requirements and warranties offered • building wraps • wall claddings • roof claddings • membranes (roofs and decks) • tanking • joinery	
	12	COMPLIANCE SPECIFICATION	
	Со	mplete for all buildings that contain systems or features that require a compliance schedule	
	а	Existing compliance schedule Provide a copy of the existing compliance schedule and details of proposed changes. Confirmation that the building has a current warrant of fitness (1 copy of the current BWOF or confirmation from Council records).	
	b	Specified systems For each specified system to be installed or altered provide details of the system and the proposed maintenance and testing regime for inclusion in the compliance schedule.	
	13	SITE MANAGEMENT AND PROTECTION OF PUBLIC Complete for all buildings	
	а	Gantries and hoardings Provide details of barriers for the protection of public and for restricting public access to site, details of gantries, scaffolding and hoardings.	
	b	Site management plan covering Delivery and storage of materials, management to control silt run off, noise and dust, traffic management and parking.	
	С	Hazardous building materials Provide safety plan detailing the safe handling and disposal of hazardous materials.	
	14	HAZARDOUS SUBSTANCES AND PROCESSES	
		Complete for all projects where the building use involves the storage, or use of or processing with hazardous substances.	
Haz	ardou	s substances include explosive, radioactive, toxic or flammable materials and compressed gas	ses
	а	Details Provide details of the materials used or stored, their hazardous substance classification (HSNO), individual container size and aggregate volume.	
	b	 Plans and specifications describing Spaces where hazardous substances are stored and used and the method of disposal of waste. Consideration of containment, pressure relief, electrical hazardous area zoning and ventilation. 	
	С	Fire report Include specific consideration of these activities.	

15	FOOD PREMISES Complete for all projects with an intended use including the manufacture, storage, preparation or sale of food products.	
а	 Details indication of type of business, including general food types to be prepared and beverages to be served water supply and sewage disposal connecting to town supply. Full details will be required if private system proposed. number of staff number of patrons (seated and standing) full details of surface finishes in food preparation, cooking, servery, storage and dishwash areas full details of location of all appliances and fixtures in food preparation, cooking, servery, storage and dishwash areas including fridges, freezers, joinery, plumbing fittings and extract hood. designation of proposed use for each area 	

Notes:

The issue of a building consent does not relieve the owner of any duty or responsibility under any other Act.

Please check with your local territorial authority regarding the requirement for other approvals required and fees payable. These may include:

- Consents under the Resource Management Act
- Vehicle Access
- Road openings
- Health licensing
- Liquor licensing
- Trade Waste licensing

A guidance document is available to help complete the section in the application form on 'means of compliance' for each Building Code clause.

Attached
The following documents are attached to the application:
☐ Plans and specifications
☐ Memoranda from Licensed Building Practitioners who carried out or supervised any design work that is restricted building work
☐ Project information memorandum
☐ Development contribution notice
☐ Certificate attached to project information memorandum
☐ Proof of ownership
☐ Waivers and/or modifications supporting documentation
