OIR: 2627/58

27 August 2026

[redacted]

Tēnā koe [redacted],

Request for Information under the Local Government Official Information and Meetings Act 1987 (the Act) (the LGOIMA)

Thank you for your email of **14 August 2026** requesting the following information:

1. ***The most recent 12 months of drinking water quality monitoring results for each supply zone that Kapiti Coast District Council operates, including where measured: free available chlorine (minimum, median and maximum), pH, turbidity, E. coli and total coliforms, and which zones are currently unchlorinated.***

   Attached are spreadsheets downloaded from the Taumata Arowai Hinekorako database that contain the requested parameters in the 'samples' tab.

2. ***The most recent chemical determined results for each pump station, treatment plant or supply zone, including metals, trihalomethanes, haloacetic acids, fluoride and nutrients, with measured values, units and detection limits.***

   Attached are spreadsheets downloaded from the Taumata Arowai Hinekorako database that contain the requested parameters in the 'samples' tab.

3. ***The water source and treatment process for each supply zone, where not already published on your website.***

   Waikanae WTP has a full treatment process that include coagulation, clarification, enhanced filtration, UV disinfection, chlorination, fluoridation and pH adjustment.

   Tasman Road WTP and Rangiuru Road WTP have full treatment processes that include UV disinfection, chlorination, and pH adjustment.

Please note that any information provided in response to your request may be published on the Council website, with your personal details removed.

Paekākāriki WTP has a full treatment process that include filtration, UV disinfection and chlorination.

Hautere WTP has a full treatment process that include UV disinfection, and chlorination and pH corrected using soda ash.
